Subject: Comments about Microsoft settlement

To whom it may concern,

As regards the Microsoft settlement of its antitrust case, please do not let Microsoft get away with merely giving away PC products and Microsoft software to satisfy the dollar value of the settlement.

I strongly agree with executives from Apple Computer who have pointed out that this action in itself would be anti-competitive in that it creates larger market share for Microsoft.

I am a long time avid Macintosh computer user, and do not want to see Microsoft slip away with this token gesture on their part.

Thank you for considering my comments.
